---

Reactjs Developer with +2 years of experience, oriented to good practices and good UI design, working with startups and software companies (Latam and Europe) in various projects, from web pages to CMS, and even custom web applications. Passionate about improving every day with challenges that take my skills and knowledge to the next level. I love learning from my peers and if I get the chance, return the favour. Flexible and full of curiosity, Looking for new opportunities to help startups and businesses grow, to participate in big projects with well-bound teams and with excellent work culture.

## EXPERIENCE

### FluxIT, Frontend Developer(Freelance)

Company dedicated to the outsourcing of personnel in the area of software development.

May 2022 - June 2022

- Developed unit tests for authentication rules in Jest for Auth0.
- Refactor validation system to conditionally display application elements.
- Collaborate in the development of customs hooks for efficient code reuse.

**Tech Stack:** ReactJS, Auth0, Jest, Styled-components, APIS Rest, Docker, Jira, Figma, HTML5 and CSS3.

### Landscape, Frontend Developer

Consultant and developer of on-demand software for small and large companies.

February 2021 - June 2022

- Developed logic for the control and management of radiological exams using highly complex forms and performing validations to verify the correct combination between the exam and the type of delivery.
- Implemented file upload and preview of various file formats (PDF, JPG, PNG, DOCX, XLSX), as well as download and delete functions depending on user type and roles.
- Implemented react-hook-form for form handling with respective validations.
- Automated tests within the development pipelines resulted in a 25% reduction in bugs..
- Established basic guidelines for application development to maintain good practices and consistency within the code to facilitate future maintenance of the code.

**Tech Stack:** ReactJS, NextJS, React-hook-form, MaterialUI, Styled-components, APIS Rest, Docker, Dropbox SDK, Jira, Figma, HTML5 and CSS3.

### Foodwize, Frontend Developer

Startup dedicated to optimise the consumption of local and healthy products through the use of smart canteens, promoting the local economy and waste reduction.

January 2020 - February 2021

- Developed a content management system(CMS) for the creation, modification, management, and elimination of profiles and data for users.
- Collaborated with the design team in the development and decision-making process of UX/UI creation.
- Contributed to the testing process in the development phase increasing the detection of errors and bugs by 15%, and decreasing the number of errors in the final product.
- Developed a website with relevant information about the startup, increasing our online presence and positioning us in the first places in search engines in our area.
- Created and managed digital assets to improve communication between teams through professional emails associated with the domain of our website, and hosting service to host our website.

**Tech Stack:** ReactJS, React Native, NextJS, TailwindCSS, APIS Rest, AWS, Amazon Cognito, Trello, Confluence, HTML5 and CSS3.

## SKILLS

**Programming Languages:** Intermediate: Javascript, HTML, CSS; Basic: python, dart,swift.

**Frameworks and Tools:** Advanced: ReactJS; Intermediate: NextJS; Basic: Vue.js, AWS, Firebase, flutter, nodejs.

**Data Base:** Basic: MongoDB, firestore database.

**Agile:** SCRUM, Jira, Trello.

**Languages:** Competent: English; Native: Spanish.

## CERTIFICATIONS

**Frontend architecture** – Platzi, 2019.

**ECMAScript 6+** – Platzi, 2020.

**REACTJS** – Platzi, 2020.
